# 1 Introduction

The `sos4R` package provides classes and methods for dealing with  
Package `sos4R` is loaded by

## 1.1 OGC and Specifications

TODO: Shortly mention and link to O and M, OWS Common, Sampling, Filtering, SensorML ...

TODO: Round-up of SOS specification

TODO: Copy terms example from annex B of O and M to the vignette for explanation

## 2 SOS Requests

### 2.1 GetCapabilities

### 2.2 DescribeSensor

### 2.3 GetObservation

### 2.4 GetObservationById

## 3 Creating a SOS connection

## 4 Requesting Data

### 4.1 Using Metadata

How can one extract the metadata from a SOS connection and reuse it for queries?

accessor functions, elements of the capabilities, ...

### 4.2 Making the Request

### 4.3 Data Format

explain why the returned `data.frame` is how it looks like

how to extract metadata

### 4.4 Using the Data

show/explain conversion to zoo, sp etc.

exporting

show example

## 5 Changing Handling Functions

TODO: explain approach, mention available non-exchangeable functions in the subsections

### 5.1 Parsing/Decoding

### 5.2 Encoding

## 6 Exception Handling

TODO: Explain what part of the exception report means what, link to OWS Common

## 7 Developing sos4R

explain 52 North

- svn code repository

- shortly describe the class structure, .R file naming scheme, ...

- link to wiki developer page

- link to developer blog
